

# Durham Unified December Survey- Student

Q1

I have read and understand the face covering and social distance requirements for schools related to COVID-19.

Answered: 397 Skipped: 0

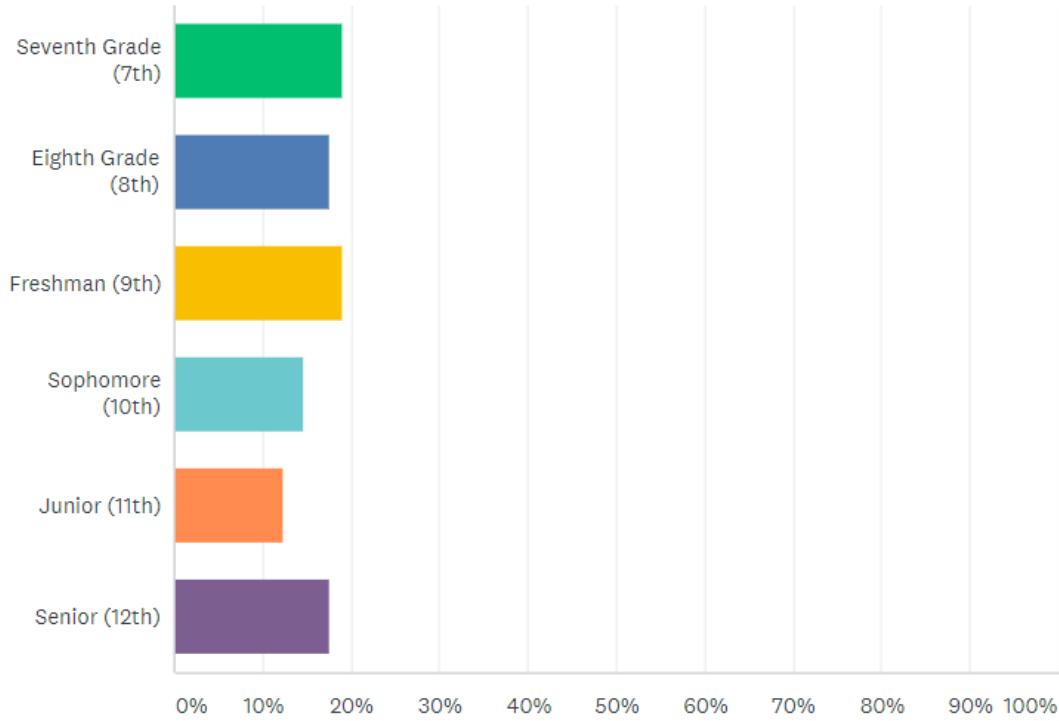

ANSWER CHOICES	RESPONSES	
Yes	99.24%	394
No	0.76%	3
<b>TOTAL</b>		<b>397</b>

# What is your grade level

Answered: 389 Skipped: 8

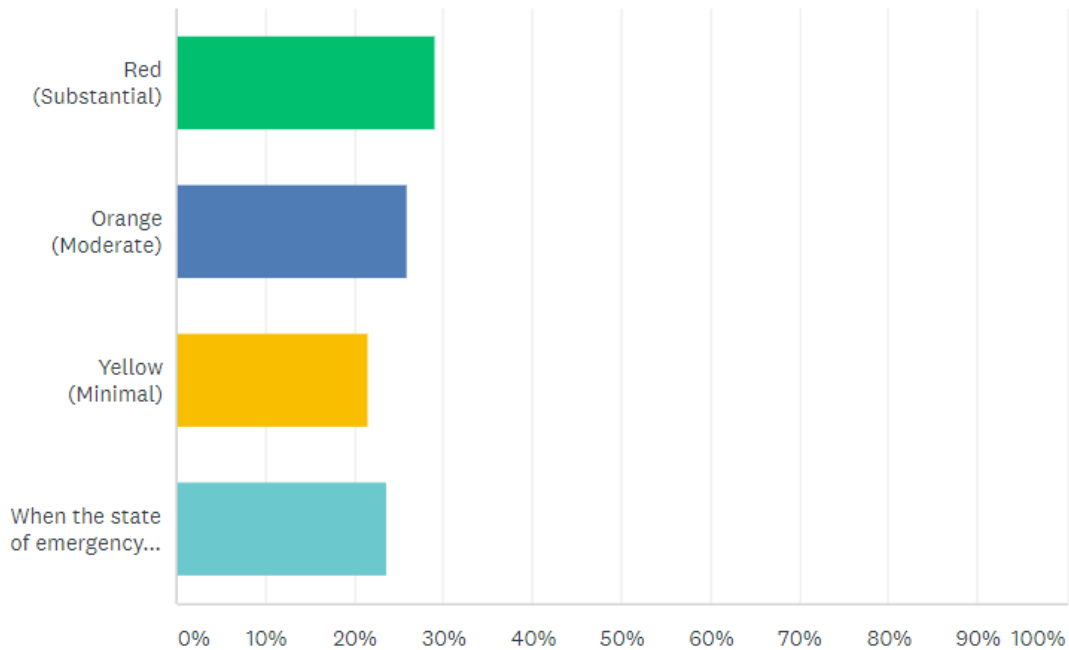

ANSWER CHOICES	RESPONSES	
Seventh Grade (7th)	19.02%	74
Eighth Grade (8th)	17.48%	68
Freshman (9th)	19.02%	74
Sophomore (10th)	14.65%	57
Junior (11th)	12.34%	48
Senior (12th)	17.48%	68
<b>TOTAL</b>		<b>389</b>

At what Tier in California's Risk Level Assessment (see above) would you feel comfortable coming back to full time (5 days a week) instruction understanding that we won't be following the social distancing guidelines?  
(Please Note: Face coverings will be mandated in any tier)

Answered: 382 Skipped: 15

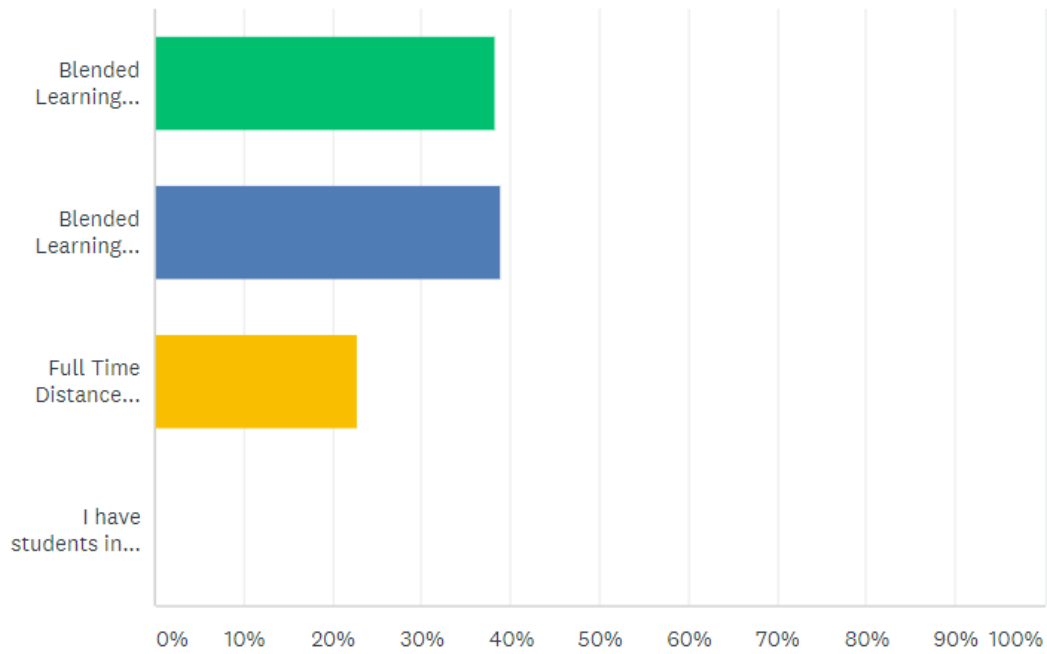

ANSWER CHOICES	RESPONSES
Red (Substantial)	29.06% 111
Orange (Moderate)	25.92% 99
Yellow (Minimal)	21.47% 82
When the state of emergency and all restrictions are lifted by the state of California.	23.56% 90
<b>TOTAL</b>	<b>382</b>

# What program are you currently attending

Answered: 381 Skipped: 16

ANSWER CHOICES	RESPONSES
Blended Learning program attending MONDAY and WEDNESDAY	38.32% 146
Blended Learning program attending TUESDAY and THURSDAY	38.85% 148
Full Time Distance learning	22.83% 87
<b>TOTAL</b>	<b>381</b>

Q5

## How to you rate the blended learning program?

Answered: 280 Skipped: 117

3.4★  
average rating

	POOR	(NO LABEL)	(NO LABEL)	(NO LABEL)	EXCELLENT	TOTAL	WEIGHTED AVERAGE
☆	6.07% 17	11.43% 32	35.00% 98	36.07% 101	11.43% 32	280	3.35

Q6

## What are the best things/successes for you in the blended program?

Answered: 259 Skipped: 138

- Being able to communicate online and in person with the teachers.
- I get more one on one time with teachers.
- We don't go to school as much
- I get more work done
- Getting work days
- The few days I go into class
- 3 days to finish work and do missing work
- Do more homework
- you get more one on one with the teachers which is a positive

- More time with my teachers. I can focus better with less kids. More time at home with family.
- going to school and actually getting the help i need.
- I'm there sometimes
- less students so i get more one on one time with teachers
- getting time to go to work, and work on my homework the days i have off.
- With the day off I can work on homework a lot
- Seeing my friends
- I actually really like the blended program, everything has been going great.
- getting my work done easily and having more time to get homework done
- I get help with math.
- I like how you can't lose your work and was easier than last year.
- I am able to get more done because I have more free time.
- Spending time with my friends and getting answers to any questions I have in a class.
- I love the time we get and I also think that I learn more with the Monday/Wednesday breaks.
- I go to school for the day and then when I get home I normally do a lot of chores and don't get any homework done but the next day I have no school and I can get it done.
- being in person
- Its good to be on campus. Its easier to contact your teachers.
- I like having the off day for school work and things I need to catch up on.
- the teachers are understanding
- I get more direct attention with less people in class.
- Only going two days a week
- The fact that there are less kids in classes so it gives students more of an opportunity to learn.
- Doing homework the next day instead of that night, so I'm not so stressed to finish it.
- Nothing it's too hard to do online and go to class
- paying more attention
- at least we get some interaction with people and have in person classes
- We get to be in a classroom for a bit

- I'm doing good in all my classes and I know that my teachers are doing the best they can.
- well now i can actually go to school even if it's two days a week but being able to see and talk to everybody
- seeing people again
- I like how I have a day off and I get that day to catch up on all of my schoolwork. I also like how I don't have to wake up early everyday.
- that we don't have to go there every day so we will not get exposed to the covid 19
- easier to get your work done
- better for asking
- Only get to go to school for two days so it opens up free time
- When I do not understand my homework, I get help.
- Less contact with other people.
- I only go to school twice a week, which makes it easier and more motivational for me. I don't like going to school, but I'd much prefer to keep doing the blended program.
- I like having more time at home.
- It's good for my schedule, and it gives me more free time on the days I don't have school. I also feel safe and I'm not worried about catching covid this way.
- I have really good grades. I also like having my own space for working in all my classes.
- nothing
- In person class time
- The best thing is there is less students, so I can focus better.
- nynth
- The teachers have more time for one on one teaching
- Student interaction
- It makes me feel protected.
- I only have to be on campus two days a week so on the off days it gives me more time to do homework and other activities.
- extracurriculars
- Safety, more time for homework
- I like being able to attend school. I feel like I do not learn enough doing online school.

- Face-to-face interaction with my teachers and being somewhat more hands on.
- i get more work done with in person school, rather than staying at home and not understanding it
- Smaller class sizes
- Not as much homework in distance learning.
- I like being able to come to school in person, even though it is not full-time it is better than not at all.
- Being able to meet with teachers.
- It gives me more free time to get other things done besides school, and it gives me more time to get my school work done/
- In the blended program I feel I actually have time to complete my assignments and do them correctly. It feels nice being able to have a few days of break from school so that we can take care of non school related plans on our off days. Such as appointments.
- I like being able to sleep during the week a little more. It also gives you a lot of time to get homework done which is usually overwhelming during full time school. When I get home, I'm exhausted. Knowing on top of the 7 hours I spent which should've already been enough learning I still have to do another 1-2 hours of homework just makes things worse. That's why I really like the blended schedule. You know that you get a break to do all of your homework the next day.
- I get 3 days a week to go at my own pace while doing schoolwork.
- I can get the information I need when we're at school then go at my own pace at home.
- there is more one on one time with the teacher
- the amount of time you get to do homework and the off days
- that im sort of liking it
- I feel safer to exposure
- There is not too much homework, so it is not too overwhelming.
- The amount of students and how good the teachers are.
- I like being able to have lots of time to do homework on the offdays.
- I have really good grades.
- I get to see my teachers in person and I learn better.
- Ehhh it's ok
- we get time to work in class, but when distance learning I was a little more likely to wait to do work.
- being able to go back and forth from school to home.

- My sou classes are good because we meet 4 days a week.
- In the blended program I guess I could say I feel less overwhelmed and I get my work done faster and easier since most of it is online. It also helps if I forget something, sometimes.
- having the days in between to work on homework
- Seeing people.
- Being able to talk to my teachers
- i get to see my teachers and understand things better
- Not having to go to school every day.
- Getting help from teachers.
- Being able to go to school
- i get to see my friends
- all the classrooms are not crowded.
- The in person days and keeping up with schoolwork
- Some days I don't have classes which is helpful because I am able to do work from other classes during that time
- I like the mixture of online and in person school and longer weekends.
- I like having more time to do my work on off days.
- I have no clue
- I get more help from my teachers.
- workload is good
- that we get 3 days to do homework
- The blended program works well since we get to see teachers/friends and the learn the material, yet we also have days at home to work on the material.
- It gives more free time and time with teachers
- I like being able to go to school and see my friends
- i think my grades have ever been is i feel like its beacuse i dont go everyday.
- Interaction with teachers for further understanding. Social time with peers. Routine outside the house.
- Smaller class sizes.
- Having more free time after I finish my homework on the days I'm not going to school.
- Getting help from teachers and just being in person

- I have days that I can focus on homework and not school work as well. Its great to have most of the week to do homework.
- I get days off to really focus on my homework in my own house and then the next days I can go learn in person, it has been really nice.
- For some of my classes its helpful being in person and having that interaction with the teacher and being able to get the help I need.
- I like not having all of the students in a class; you get to be more involved in the conversation. Also on the off days you can work at your own pace and not get slowed down or sped up by others.
- the quiet classrooms and how one on one the teachers can be
- less risk of covid.
- Less stress inducing environment while at school. Less students, less crowded, less drama, etc.
- I like the balance of in school lectures and studying at home
- I have more days off to focus on homework assigned.
- Being able to go to school.
- there were fewer students so the teachers could help everyone a little more.
- More time to complete my work
- I like that the classes are small because it make's things quieter and things seem to get done faster.
- I get more time to do work on my own and I get more sleep.
- Actually going to class
- it gives me more time for me to work on stuff when i get to stay home on tuesdays and thursdays.
- i still get to attend school which helps my understanding more that all online
- I'm allowed to have in person class which helps me learn the best. My grades definently rose since coming back to blended. It is kind of nice to not have school 5 days a week but I would rather have 5 days a week.
- I like how fast I can get my work done on the online days
- smaller classes.
- Nothing.
- I think the best thing is that we are able to see our teachers and ask for help in person if needed
- I like just have time at school because you can ask teachers but online you can't really talk as much.
- I can do things other than school on the off days
- I can actually see human beings and not justg stay at home.

- more one on one help with teacher since class sizes are so small
- The only good thing is student and teacher interaction but there still isn't much of it.
- Getting to talk to our teachers.
- Not as stressful.
- Get an extra day to do homework/assignments
- In class learning
- I still get to go to school
- more time at home to do work
- there are grace periods for late work if needed
- The amount of free time we have to do our work and etc. Gives us more time to be flexible.
- Going to school
- Nothing really i need as much time as possible with teachers, and i miss my friends because we got split up do to this scheduled.
- I get to at least see Mr. Atkinson.
- being 1 on 1 with teachers and getting help
- I get to do to school and see my friends
- For me it would be that I can see how they are showing me the lesson step by step without having any trouble understanding.
- There isn't any
- I got to be with my friends and taking our mask off.
- I am able to take breaks.
- The best things in this blended learning program are that everything is clean for a change and there is soap in the bathroom again.
- i like the acsellus part were you can redo your answer if you get one wrong
- I'm not sure, I guess I don't actually have to go to school every day?
- It is nice having two days a week because I get to see my friends and teachers, and get immediate help when I need it. When I have my off days, I get a bug amount of work done.
- That we are able to attend 2 full days a week with smaller class sizes. And the online program that we used has been a lot better to understand. I understand math when in person I would struggle.
- Being able to work at stuff at home.
- working independently

- We can get more help from teachers when we need it.
- I can finish all my homework very easy with all of the free time.
- I think the best things about the blended program is that i get 1 whole day to get all my work done.
- i get to go to school
- That I can see my friends again
- If I have a question about something I get to ask a teacher in person and get more help.
- I love that I only have to go to school 2 days a week.
- I have more time to do homework.
- The only good part about the blended program is I get to see SOME of my friends.
- ?
- I usually do better around fewer people, so having smaller classes can help me get my work done faster therefore I have been able to get all of my work don eon time.
- I get to be home 3 days out of the school week
- The best things for me in the blended program is being able to be in class and understand more easy
- Days and more time to do home work.
- not as much time in school, and more time with family and more time to work
- being home three days a week gives me time to do my work
- Not as many people around me, I feel anxious whenever someone is next to me while im doing homework or classwork.
- the zooms
- the best thing are is that everyone is 6 feet in class and lunch.
- small class sizes
- nothing
- i like small class size
- There's not many things that personally benefited me in any specific ways. But I guess it's nice to have a smaller more teachable class with less interuptions.
- It has a lot quieter and not that much fun
- I got to stay home and do homework
- I get to see my teachers, and get more help from them

- I especially like the blended program because it cuts a lot of slack of my work. For example, when we have normal school, I'm tired after the 7 hour day and It doesn't give me much time to spend on work related things. With the blended program, I have days in between and it gives me a lot more time to do work and It also helps out my sleep schedule. I also like the fact that there are less people at school and Its more calming then a talking full class of people. I feel that blended program should be how it always is even without Covid-19.
- there is less people so I'm able to get more help.
- doing my essays correctly
- homework on computers
- The best things for me in the blended program are that I get to meet all the teachers and do more hands-on projects.
- Seeing my friends.
- It is better than at home learning and the teachers actually post on google classroom so it helps me remember homework
- I like how we still get to go to all of our classes and still get to see a couple of our friends.
- I can get help at home if I am stuck on a problem
- There's less people so the spread is lower. I can see my friends.
- It's good because it give me in person learning, but not enough.
- PE and taking off your mask and being with friends at lunch without mask
- It is easier to understand stuff in person than online.
- I like that I am with my friends.
- math, in person with a teacher teaching you its way eiser.
- i dont have to go to school everyday
- With less people it is easier to get help from teachers.
- We get the right amount school and home.
- The classes are a lot smaller, so it is easier to learn.
- That I get a bit of a break of wearing a mask on my off days. I can also get more work done in those days.
- Some of the best thing in the blended program are that I can see my friends during school days and relax at do my schoolwork at online days.
- My grades.
- I can get some work done on the days where its only online
- Being able to have the teacher there to help me when im stuck
- i still get to see my friends but at the while still social distant

- With the blended programs I don't worry about Covid-19 at all.
- The thing that i like is you can wear mask on only two days and not wear them on the other 3
- It allows me to make sure i dont have any late work items easier
- Doing school in school then doing homework at home the next day.
- The classes are a lot smaller and it makes it easier for me to concentrate.
- that i get to learn more things
- teacher have more time to focus on kids
- i get to see my friends
- There is some in-person time.
- That in some class we do all of the acellus lessons together in a class and we learn together.
- I only have to go to school for 2 days a week.
- I don't know
- Get to see some of our friends.
- The social distancing
- The only success I have is good grades.
- More one on one time with teachers
- It is a good mix of time at home and time at school which makes work efficient.
- Going back to school.
- Better than not going to school at all.
- being able to see other students
- more time to do homework
- that its hard to do
- I don't really have any big successes. Its really just the same excepting the two classes I will talk about next.
- ive progressed in work and its much easier to stay focused
- for my self personally i like it way better but if i want to keep my grades up easier then going back to full time is better.
- That they can help with my dyslexia
- being able to get work done at home.
- learning to do all ur homework at home by your self

- i was able to work at home and get ahead on classwork/homework
- Smaller classes
- Gives me time to catch up on work
- more free time during the week
- I love having half of online and public school its a great blend and my academic level has improved.
- Being able to understand and have a hands on experience in class.
- Still allowing some in-person instruction whilst keeping the risk minimized.
- Seeing other kids and getting in class instructions
- Being able to be social with teachers and students.
- That im able to go to school all day to understand what we will be doing.
- people are allowed more sleep even though i dont
- Nothing, it is twice as hard to stay motivated and keep track of what is going on in each class.
- i can get more help from my teacher.

Q7

What are some of the challenges you have in the blended program?

Answered: 260 Skipped: 137

- Retakes for tests, being able to catch up accordingly.
- The online part confuses me.
- Not really anything
- I don't get to see most of my friends
- not seeing everyone
- The online schooling
- keeping in touch with teachers
- Homework
- getting my work done on the off days because i have no teacher help.
- the communication

- Not any I can think of.
- i don't really have any
- im not there sometimes
- if i have a question about grades, homework, etc. on thursday, i have to wait 4 days to ask
- acellus, the questions have rarely any similarities to the video we watch. unless the questions are different everytime.
- Not seeing my friends from the other group that goes on Tuesday Thursday
- The face coverings they begin to get annoying at the end of the day
- I have not had to many problems
- i cant think of any
- People don't get punished enough for not wearing their masks.
- Sometimes I feel like I don't do enough work and feel like i am behind all the time.
- resources for classwork are spread apart. acellus isn't a good program and takes the fun out of learning. no one likes sitting watching a video for 15 minuets and it sucks the motivation out of you. and when you get a problem set wrong it doesn't teach you what you need to know. it teaches you that if you get this wrong then your going to get punished, so regardless if you want to learn the content or not. you have to get it right, none of the information stays in your head for very long and the presentation bland. the workload throughout all classes is doable. but doing work at home feels like a chore, its less of a test of knowledge and more of a test of whether or not your going to get around to doing it.
- I really don't have any challenges.
- Keeping up my grades.
- The only challenge that I have is if I have forgotten how to do a problem.
- Sometimes I don't have wifi so it is hard to check in and do homework.
- not being in person full time
- We aren't getting as much work and learning as much.
- struggling with distance learning, getting bad grades
- When I'm home and need help on something it's hard to get in contact with teachers for help.
- comunication
- A lot of my friends are in the other group.
- It's hard to keep up with the work on my off days
- The fact that I cant be with all of my friends.

- Not being able to get help everyday.
- It's too hard to go back and forth and know what is going on
- waking up
- I feel like I am getting half an education and only learning on the two days I get to go to school. And I miss interaction with all of my friends that are on the B group and it's not fun and I do love going to school but I miss my friends and learning things, I'm just not learning anything really.
- Everything is online and we barely are in class
- I'm not having any challenges.
- sometimes I do stuff at school and then the next day I'm at home and I need help but I can't ask anyone because there's no one to ask
- people not social distancing and wearing masks
- I don't really like that I don't get to see my friends that often.
- not many but I really wish we can do hands on learning
- having to email or write to your teachers and them not getting back to you right away
- Since we only go twice a day I struggle in math
- None
- Not much, I feel like it is easier than online.
- online learning
- It's hard being able to not worry about attending school one day, then immediately have to worry about it again.
- My brother's friends, which are amusing I guess, go on Monday Wednesday. Recess is boring because we just stand around with them. They just don't like me anymore, and that's a proven fact. Also, she shares almost every class with me. She has a habit of using me when I'm needed (such as a partner essay she barely works on, if at all), then dissing me when I'm "not needed". I have to say this because seeing her at school everyday makes me sad. Also, "Acellus" and "Get More Math" are not good, but especially "Get More Math". I loath it because it is deeply flawed. Frankly, it is trash. Despite of all this, the blended program is necessary at this time. Tuesday Thursday will do.
- I don't have enough time to do classroom assignments.
- I only know people in the A group due to the fact that I am new this year and I would like to meet more people.
- I couldn't attend school for about a week and a half, and I had trouble contacting teachers to get my absent work. There were no zooms for my classes, so I had no instruction for a week, which made it very confusing.
- motivation

- Not having full time teacher instruction
- Not exactly a challenge but it's hard hardly having any friends, because they're in the other group.
- nothing
- There aren't too many challenges for me, the schedule right now is pretty nice.
- Not being able to see my friends.
- Getting work done on my off days
- Acellus and getting help with homework
- only going to class 2 times a week
- Teachers are supposed to be assigning a full class period of work for at home on the off days but instead some teachers assign more work on one off day than we do in a full week of class.
- My friends are in the opposite group as me so I don't see them at all anymore. Also having to teach myself new topics on my off days.
- It is difficult to switch everyday between online and at school.
- none really
- Not enough class time.
- Not being able to talk to teachers in person everyday.
- It is hard to keep momentum in work with a broken-up in-class schedule
- Going every other day, I don't usually want to go on Wednesday's after being home/having a break on Tuesday.
- It's a little confusing if you get your days mixed up.
- It can get really lonely being home all day by yourself, especially when both my parents are at work.
- I have yet to experience any significant challenges in the blended program. A small one might be remembering to check into your third period class on the off days.
- I don't have many and I really do appreciate all my teachers but I will say that I think a few of them are doing a mediocre job at explaining exactly what we need to do.
- Acellus is really boring, and some teachers don't tell you you have assignments due at all.
- when i try to email teachers i hardly ever hear a response back and its hard to get a hold of them unless you go to the school
- not having enough time to get help

- make it to where classes arnt just giving you busy work and make it easier to be with teachers
- idk to be honest
- getting taught enough information to understand my assignments
- Well I dont think there are many issues.
- That I don't get to know my other classmates that are in group B because I am new this year.
- Nothing
- Not really any challenges.
- Not everything gets posted on Google Classroom. And when it is, it is not labeled as an actual assignment.
- I don't learn as good on online.
- not being able to ask the teachers questions on the off days
- Not having consistent teaching.
- I don't get to see all of my friends at the same time or at all and overall the computer hurts my eyes. Also, this could be just me, but I feel more distracted working with the computer and my phone online now.
- Because everyone just got thrown in on random days, I ended up being on the opposite program as most of my friends. I'm not saying I wouldn't pay attention in class or anything, it's just I can only really have social interaction with them 3 days a week technically, but on 1 of those I have to do work too.
- The off days of school
- Not seeing people, the loneliness of being at home is suffocating and distance learning is really impacting my mental health :/
- Acellus, I just really don't like it. I would much rather have a teacher explain it to me than listen to an 8 minute video in monotone
- not going to school everyday.
- i only have my teachers for 2 days
- Not being able to go to school
- Everything is online most of the time.
- not being in a normal classroom
- i don't have any.
- having motivation to complete the schoolwork
- Some concepts are a bit harder to learn through SOU zoom classes but it's overall not very bad.
- None of my friends are going the same days

- My grades
- It is hard to adjust to right away but i'm good now
- Asking questions in class is more difficult and learning an entire lesson online is much harder
- not having enough time with teachers
- calculus is hard
- Sometimes teachers want things turned in online and other times they want to check it off in person so that is kind of confusing. I also have trouble retaining focus on Fridays, so sometimes it feels like I have a 3 day weekend.
- I don't have any
- I dont like that things are so unknown and I dont like not being able to just directly ask when I have a question
- sometimes i forget to sign in on the days i dont have school .
- Limited time in classes with teachers and quickly moving through topics and subjects.
- not being able to get help everyday
- The only thing I can thing of is not being able to reach my teachers as well as I would if we were in school that day.
- I miss my friends. Hard to get through the day with no one. It really sucks. Ruining our social life.
- Nothing much.
- It feels like now that we are in person there is so much work we have to do and its hard to stay on top of it all
- I don't really have any challenges.
- For example Ag Mechanics. We have less time to work hands on on our projects.
- not being there
- don't have any.
- Some teachers do not grade assignments in a timely manner. Students have been overloaded with class/homework because we have "nothing else to do."
- Motivating myself when I am studying by myself
- Keeping track of assignments.
- I don't like the Acellus program and it's hurting my grades.
- on the off days, people barely got any work done

- Is not very easy to teach myself when teachers are given enough time to teach me
- I don't feel like I have any challenges.
- No I des
- I don't get to see all of my friends from other grades.
- nothing
- i dont get the same amount of instruction and its hard to communicate with my teachers, i would much prefer a traditional model
- The distance learning for me, I only log into 3 classes so the pace is slower which I don't mind, but in the SOU classes the pace stays the same, but I am not in those classes 5 days a week. It makes it difficult.
- Challenges are when the teacher doenst repond to your email, but its not that much of a challenge because you end up seeing them at school in a few days and you can just ask them in person
- understanding homework
- i dont know.
- It is harder to remember what work we have on our days off.
- I feel like I am falling behind and I am not as motivated to get work done.
- I dont think that it needs a change.
- not sure
- Not getting help as much
- Still having a lot of work.
- The tests online are very confusing.
- Acellus
- Acellus
- I feel like I am not learning as much
- nothing
- i personally dont believe i have and challenges right now.
- A bit of a confusion for classes but that was in the beginning of the program.
- Not going to school
- Not enough in class time.
- English
- not seeing as much friends
- It's not one on one with a teacher if you are really struggling.

- I don't really have any problems except for P.E., I don't really like playing basketball because then I want to take my mask off because it gets too hot.
- Not being there 5 days a week.
- I can't focus as well online. I also don't understand some things I can't ask about while I'm at home
- Acellus, social distancing, and breathing with my mask on.
- There are many challenges that we as students have faced during this blended program such as the teachers not teaching and taking advantage of the online programs such as Acellus. Another challenge that we as students have faced is how we have to keep our masks on even when we are outside and over six feet away from each other. Another challenge that we have faced is how ridiculously short the lunchtime is for us to eat.
- the classroom work gets a bit confusing with all the work but it's getting better and more organized
- It's harder for me to stay focused on my school work.
- I feel like I'm wasting my time at school, either not learning or just not doing enough work.
- Too much hand sanitizer. Even amount of homework from all classes. I have had way too much homework from English on a daily basis, there are days I spend more than four hours on this one class. Multiple times I have spent all day just doing English homework.
- Taking everything back and forth.
- trouble with computers
- It's hard to stay on track.
- Hard to learn with just 2 days a week in person
- sometimes I don't get what I am doing and I get confused on it.
- non face to face contact with educators
- Sometimes Acellus is a little overwhelming
- My English teacher gives my class a lot of homework and the times when I could not do them because I had to hang out with my family or something she said "If you did not do the homework, do not make up excuses, I don't care about them." And I just try and tell her why I wasn't able to do it.
- I have to wear a face-covering and teachers are showing some of their political views.
- Getting classwork, homework and Acellus all done on Friday
- The masks are hot and hard to breathe in, at lunch you kinda have to yell to talk to your friend, PE we don't have as many things to do

- Keeping a mask on all day, social distancing, and even though we get to see our teachers most of them are using Acellus to teach instead of them doing the work.
- They give you a full day to do homework when your not at school but then I do things and it turns into 2 hours
- Overall, I'd say I don't really have many problems at all. The only thing I dislike is the strictness of staying over 6 feet away, I understand why we do this but I don't like it.
- homework
- Communicating with some teachers.
- sometimes I forget to do something and I don't have people to remind me
- joining classroom meets
- everything the teachers don't even teach us anything and they just make us do acellus and it's not like were actually learning anything.
- Just wearing the mask. It annoys me for P.E, that's it.
- sometimes its help learn
- sometimes I get stuck on a question and need help
- not knowing what has to be turned in at what time
- it would be more fun
- getting all my acelluse on time for evey class
- communication and relationships with teachers, not getting the full educational experiance without group activities projects some hands on activities
- Some challenges are that its hard to sit next each other.
- Really the only problem I have had with it is not enough explaining in class so its hard to get the work done online when It's a totally different subject then what we learned. I think we need more explaining about our work.
- I don't really feel like there are certain challenges for me in the blended program. I do think it would be great if some of my other friends were in the same school day as me.
- Having to have my mask on all day, and being 6 ft apart from my friend
- no
- i don't like achellus on top of normal school work
- you cant play sports. projects are a lot harder to do. we cant see some of our friends.
- staying on track

- Short lunchtimes. I often am not able to eat all my food because the lunch period is too short.
  - Not much
  - I don't really like how it is split because all of my friends are on the A group.
  - All the rules at school, the teachers being to strict, accules, having no actual break and not being to go on phones when we already can't get close to each other or do anything else.
  - The challenges are that teacher have no real schedule to follow, they can post whatever they want, whenever they want, without warning. It makes the whole year challenging for us students. They need to give us assignments while we are in class, and no where else. They can give us assignments for the days off while we are in class too.
  - That we have to get on the meetings on the days that we have off.
  - I have no challenges.
  - Acellus and wearing mask and social distancing
  - trying to remember to stay 6 feet apart
  - i dont get to see my friends and ive been un productive on those off days
  - Some challenges I have in the blended program are that on the online days, I cant ask my teach for help. Also, I feel like there is more school work thanks to the blended program.
  - Not being able to see friends everyday.
  - Keeping up at home,
  - I don't really find a challenge I have with the blended program.
  - I don't like ascellus. I don't like the strong emphases on mask wearing and social distancing.
  - Assignments
  - Acellus.
  - Accelus and history
  - not many at all
  - Sometimes its confusing.
  - Some of the blue dots marked on the ground fade out and I forget where to stand.
  - Some of the acellus lessons and videos dont give enough help in the videos
- also coding is super hard and i think poorly done
- I have not had any big challenges

- I don't have any of my friends that I like.
- you dont yet to be with everyone
- i learned more things
- i have to wear a mask in pe when im playing basketball
- I think coding is a big problem acellus is the only thing we do and we are not learning it is the worst part of my day.We should not do acellus in class and it be the only thing we do
- Forgetting to get on my meet.
- We have to stay six feet apart even if we have our masks on, what's the point of them if we still have to be six feet apart?
- The if you need help you have to wait
- Don't get to see all of our friends.
- We are learning one thing in class and then we have to learn a whole new way on Acellus.
- Nothing.
- Distance learning days
- Confusion when working on computers
- No breaks from masks outside and the mask wearing discipline. Missing in person instruction and help.
- acellus
- the amount of work
- everything
- I don't have enough time at home to do all the work I've been given, so I have to not work as hard with work in English and Science because I have three other classes to watch my work on.
- having to switch from going to school one day to then staying at home is a challenge for me to work and stay focused
- self motivation and it is even worse when full online
- Understanding things
- Having to go to school and wear a mask.
- grades
- staying focused
- Not being g with my friends
- It's my senior year and I just feel as if it's not as good as it could be and I'm not doing as well as I could in school because if it

- not being able to be with my senior class and the learning is very hard
- there are not many challenges that I struggle with
- The days I don't physically go to school i find it difficult to check into my other classes at unusual times of the day and its hard to pay attention watching the class through a glitchy screen.
- Not having a lot of time in class to have the teachers help
- Focus and concentration in the school setting and continuing to stay stay on track at my own pace because everyone talks while im trying to complete my work and i get distracted or frustrated when others are talking even with teachers and trying to find time to work.
- Focusing when in not in school and the insane amount of homework.
- its hard to communicate
- Not having sports causes a lack of motivation for me. As well as not being at school with ALL of my friends
- I feel like I am not getting the full education. Were getting less than half of the lessons than e should be. I can take any of the tests or extra circular I may need or do need to graduate and go on to a four year college. Some of the need to know information I need to get through the school gets left out or forgotten. If my teacher doesn't start or even join a meet I still get marked absent. There is no plan should I have a sub and yet we are still required to know what the teacher wants us to give her/him when we come back. And another of the biggest problem I have with the distance and blended program is that we rely heavily on the internet and electronics. But I know most of Durham has horrible internet connections, some things don't get posted, or things take so long to load they become late or delete themselves. Essays can delete themselves due to connection troubles and we'd have to rewrite an entire five pages before 330 when its three. There is no easy way to do this but I believe we are making this way harder than it needs to be. Also my family got split up so my parents have to take half of us to school on one day and the other half the next.

## What is one thing that would help you perform better in the blended program?

Answered: 245 Skipped: 152

- I think one thing that could help is less homework assignment wise but the same amount of work. A lot of problems kids have out age has to do with stress and overloading some students with assignments could really stress the person out.
- a small zoom for every class on the off days.
- I have no opinon
- ldk
- nothing
- Ditching the blended program entirely
- nothing
- Going on Friday's to school
- to have extra help in all classes.
- Sports
- having them explain what to do
- i dont know
- less homework
- working on a subject for a longer period of time. It's just hard learning it in a short amount of time.
- If we actually played the sport and didn't just run around in circles
- Honestly nothing much
- Nothing so far
- if i get extra help with english
- Less English homework, no 8th-grade project (we're in a pandemic and don't need additional stress from an unnecessary project), people actually getting punished for not wearing their masks.
- nothing, sorry that there is nothin you can do to help me feel better. yet again sorry
- remove acellus and less at home work
- Better communication
- Maybe an optional go to your teacher day on Friday where you can ask questions if your stuck on Ase

- I don't really know.
- I can't think of anything.
- My opinion is the teachers are doing the bare minimum to help struggling students. Other schools are offering in person learning for struggling students on Fridays when no other students are at school. Teachers arnt communicating with parents on grades so we dont know until we get report cards/progress reports
- Everything is decent so far, so nothing really.
- a restart
- A class on my off days were I could just get help
- If we went to school at 8 :00 instead of 7:55 because the only thing the five minutes is get me late.
- Everything has been functioning pretty good so far.
- Full time full campus learning it is way easier to do.
- for it too start later
- My friends from the other group and more pressure to do assignments
- If we had more time at school and in class
- Getting rid of the acellus programs
- let us to go to school all week
- more communication between students and teachers
- I don't know because I have really good grades right now.
- hands on learning
- less online while in the classroom
- if the teachers would put in the grades on time to really let you know what you are missing or need to get done
- More help on off days
- I think everything is good of the blended program.
- more time in class
- Getting things assigned earlier
- I would preform better if "Get More Math" was removed. Also, one more thing, it would be nice if art class was more challenging.
- I don't know
- If the teachers maybe set up like one zoom a week, just to explain things and remind people of upcoming assignments.
- I think people keeping their mask up all the time.
- nothing at this point

- More in person class time
- A longer lunch, we're stuck in the class constantly putting hand sanitizer on, and have our masks on. The part of the school day when we can take it off, eat, and talk and its shortened.
- less homework
- The way it is right now works pretty good with my schedule.
- The ability to meet the teacher on my off days
- Nothing. It is fine for me.
- Better teacher communication
- no suggestions
- The lunch time is increased, students that do not eat at the cafeteria are unable to finish eating and then go back to school without the need to rush, the time for lunch was decreased from last year, it would be better to have 20 more minutes of school and get a longer lunch.
- Not using Acellus in replacement of books or paper.
- I think that two days a week for my non SOU classes is not enough school time a week. I would like to learn more and to be prepared for college.
- focusing more i guess
- distance learning online meets for all classes on the off-days so instruction time is increased
- Nothing.
- Keeping the class sizes small
- Going to school full time.
- Nothing, it's fine the way it is.
- I'm not exactly sure as to what would help but maybe changing the checking in platform on the off days. Rather than making it be at 10am, it could be just making some form of contact by 3pm.
- I think if all the teachers had the plexiglass panels in front sort of like Mr. Wilson we could hear them better as well as them being able to breath a little more (In turn they could probably teach better as well). Its already hard enough for the students having to wear a mask all day but I cannot imagine having to wear a mask all day and having to talk for almost every minute of it. There has to be some sort of funding for this. not sure though, I'm just a student but I just feel bad sometimes because you know their throats must be super dry and they must have painful headaches.
- not sure to be very honest
- no acellus just have the teacher teach us like they used to
- n/a it is good

- being able to have more time to turn things in because its hard to do it all since we have two days of school and the same workload as if we were going everyday of the week
- Post all assignments on Google Classroom, and label them as such. This will help me know exactly what is due and when.
- More in school
- Maybe more guidance on off days.
- I like that I have my own space to think and work in all my classes.
- I don't know
- if there was less work
- if maybe students had a little preference to what program we were on, so we are more likely to get our friends in the same program, and we can all see each other more.
- If google classroom would show assignments even AFTER the due date has passed and remained up until the work was complete.
- I'm not sure.
- no acellus
- certain teachers being more clear about when things are due and if they want it in person or online
- A lot more google meet time for the off days
- Nothing, i dont like it
- More in person school
- ldk
- Being able to have less classes.
- nothing i am doing fine
- nothing
- nothing
- having more motivation to complete the work
- Less work honestly
- I'm doing well right now, my teachers are very clear about what our assignments are.
- For the teachers to understand that this is not ideal for us and that we feel stressed and the work we are getting is not helping that
- Busy work has increased due to the minimal instruction time which only causes more stress and less time for important work.
- nothing

- less homework
- I'm not sure, being back full time would help.
- Everything is good
- i dont know its not bad i actually like it.
- Less blended. More in person.
- I honestly think the blended program works great.
- Absolutely nothing, go back to school with everyone.
- nothing
- Teachers helping a little more as far as communicating with us when we are at home because its hard when they wont answer us
- More interaction with teachers.
- I have nothing that needs to be changed
- rules should be more enforced.
- more office hours
- idk
- Use a different math program.
- Teacher availability. Communication with Parents/Guardians.
- All classes having stuff due at the same time
- I don't think there is anything that could help me perform better.
- Nothing, it is good.
- It's fine right now
- nothing I really like the blended program
- have less tests and exams
- changing it to the traditional model
- I feel that the blended program we have right now is actually a really good program and it works very well. I don't think there is anything that could help me preform better besides going to school more.
- i dont know.
- I think we are performing the best we can with this blended program
- Have school more
- Going back to school full time.
- A higher math level.
- not sure

- More time for help but with people getting quarantined i'm not too sure about a full 5 days.
- Going over the work more that we do on off days.
- Not having Acellus being the main site for some classes/teachers
- More instruction.
- No acellus
- nothing
- nothing
- Not sure, nothing more.
- Full time school
- Ether more time in class or back to the full five days.
- being around people you are used to
- If it was more structured.
- Teachers giving instructions clearly and explaining thing good.
- hard copy work
- No masks and no social distancing.
- All paper and class. No online classes.
- One thing that would help me as a student perform better in the blended program is maybe a longer lunchtime, some freedom to take our masks off when we are outside and over six feet away from everyone, another thing that would help me as a student perform better is more interaction with other students and my friends by having everyone go back full time; another thing that would help me as a student perform better is NOT HAVING A DOUBLE STANDERD, some of the teachers are not following the rules on the masks.  
If the reasons above could be followed it would make for a much happier student mass which results in better grades and more eagerness to learn, and overall a better thriving school.
- mabey they can make a website that tells you how much more work you have but its good so far
- I don't know.
- Have every teacher use a "week at a glance" slide show so I know how to pace myself.
- I don know.
- Having all teachers on the same page with how much homework is given.
- more reminders
- Nothing.
- Going to in person more.

- I think that the teachers should go over it or help the kids who didn't get it.
- structure and time management I did better when checking in with classes at designated times
- being able to work on more of the classroom hw we have in class
- It would help if everyone got a little less homework and If the staff calmed down a bit more when people stand next to each other WITH a mask on.
- I don't know.
- No more Acellus or at least less, and not getting yelled at every five seconds for standing too close to someone I probably saw the day before with no mask.
- There is really nothing that holds me back, I'd say that I have a fine time while at school.
- For "people in higher power" to simply ask us to stop getting close together instead of threatening us
- I do not know
- Everything seems to be good so far.
- not as much Acellus
- go back full time stop doing acellus and just go back to regular school, the way it's supposed to be
- Nothing.
- not to have acelluse
- less assignments, more time for help in class
- less assignment to help.
- if we just went to school full time
- doing it in school
- I would get to see my friends
- I personally think the teachers are doing a great job teaching and couldn't do anything to better my experience.
- I personally dislike acellus and how it works, I think that we should do more activities out of acellus because its really demotivating to sit in front of a screen for hours and listening to information that doesn't really relate to what we are learning in class. I think I want other assignments than acellus because some of the things about it really frustrate me.
- For now its better if we stay like this because of the numbers of covid, but once the numbers get lower everyone can go back to school.
- no more mask so i can learn and hear better
- better presentation in person
- if I was able to play basketball and not have to sit around at break and be bored.

- Teachers being less strict, having phones at break or being able to do something at break. Having a break for masks or let kids actually to talk to eat other other than have them apart every single minute of the day.
- Nothing is going pretty well
- I think that if we go back to full time that it will be better.
- I do not know
- Extend the lunchtimes by at least 5 minutes.
- More effort from you.
- not wearing mask in school or not social distancing
- Have the meetings later in the day
- Doing presentations in person.
- if we didn't have accelus
- if i didnt have to do acellus
- full time at school
- Take out ascellus. Don't put as much emphasis on mask wearing, and make school more normal.
- One thing that might help me perform better in the blended program is if we could meet with our teachers if we had a question or needed help and get that answer or help right away.
- Not doing Acellus.
- More school.
- I'm not sure, the blended program is working pretty well for me, I don't really find any problems.
- I am doing fine in the blended program.
- A little help from teachers
- nothing
- Nothing, it's fine as it is.
- I seem to be fine on almost everything so i cant think of anything right now
- I dont know.
- I don't have anything that would help me
- Not doing Accelus.
- really nothing
- nothing really i think its ok right now
- Not doing only acellus when we go to school and we do not learn anything

- Bring back all students full time
- if you did not have to wait
- Seeing all of our friends.
- Not having to stay six feet apart with masks on, also less acellus more actual school work.
- Nothing.
- Less computers
- Going back to school full time 5 days a week with full homework.
- Go back to regular school
- being taught while we are at school
- less work
- if we didnt have to do this covid stuff
- Not as much homework, not everyone at home has all the time in the world and more. I have no free time at home on Tuesdays and Thursdays with my personal life and school work combined.
- most likely go to school every day
- if i had self motivation
- Understanding things
- Being able to be home all week.
- to be back fill time
- i don't know it's hard and stressful not getting much help
- being full time
- Not being so far from other students seating wise, it prevents me from being able to ask them questions
- NO more acellus
- Maybe not as much acellus there's quiet a bit of it.
- Having all the classes i have to check into on my off days in the same time period so i can finish them and be able to do other things throughout the day.
- Going back full time
- not being in the blended program and being able to work and complete my work in the quite of my home.
- Im not sure. Id say more explanations or help with homework but that is most likely just me.
- a new start

- Sports coming back. (even if the crowd is limited).
- I feel like we need to go back to school full time. We'd be getting the correct amount of circular and lessons, we wouldn't have to rely only on the spotty internet, and we wouldn't get marked down for our teachers mistakes.

## How to you rank the Full Time Distance Learning Program?

Answered: 79 Skipped: 318

3.7★  
average rating

	POOR	(NO LABEL)	(NO LABEL)	(NO LABEL)	EXCELLENT	TOTAL	WEIGHTED AVERAGE
☆	6.33% 5	11.39% 9	26.58% 21	22.78% 18	32.91% 26	79	3.65

Q10

## What are the best things/successes for you in the full time distance learning program?

Answered: 75 Skipped: 322

- Its somewhat easy some days can be hard but most of the time its pretty easy but right now i'm still getting comfortable with it.
- I don't have other students distracting me and I can learn and understand better and rewatch videos if needed
- I have more time on my hands to do my work, and I'm always in a silent place
- i dont have to hear the teacher talk and i can get my work done
- I like working with the staff.
- Nothing, I do not like Distance Learning.

- Nothing, I do not like Distance Learning.
- Being able to study from and learn from home
- having teachers to help
- Great Grades
- I can work at my own pace with a lot of stuff
- able to take time on work
- Using Acellus for note taking
- not sure
- I am not risking myself to get sick, it feels easier to do homework.
- Working on Acellus and talking with teachers everyday is ok
- The available teacher meetings
- I can stay safe and get help from people
- being able to do chores and sleeping in that's about it
- being able to be alone and concentrating
- I am able to adjust to my own pace, I don't feel as stressed and I am able to communicate greatly when I need help with my work.
- Actual assignments not acellus.
- i can do my work all day instead of listening to teachers
- being able to kind of go on your own pace
- The to do list in Google Classroom, it helps me organize my homework better.
- That I know that I'm safe
- Friday Advisory
- google classroom assignments/duedates
- finishing my homework
- Well they don't give us as much work and that's nice because it's much harder to concentrate at home than at school
- We don't wear masks and we most likely won't get covid
- The full distance learning program has helped me complete homework sooner and it's much easier.
- That I can pass myself.
- Not having to wake up so early
- I like the daily meetings for check-ins and questions, it's really helpful. The spanish meetings we have are great.

- I like when we have Google Meets with teachers.
- Gives me more time to work on my assignments and there is not a lot assigned
- the teachers help more
- It's a good style of learning
- I love being able to feel safe in my own home while getting my education as well as doing things at my own pace
- I get individual time with teachers if I ask
- I get all my work done.
- That we have more time to sleep and have more energy for school work.
- For me it would be able to have peace and quiet at home.
- The best thing in the Full Distance Learning Program is that I'm safe and I won't infect my family.
- None
- nothing i want to come to school
- some of the best things in distance learning are being able to stay at home while doing school (not needing to leave the house)
- the teachers were so nice
- One of the best things for full time distance learning is i can work at my own speed
- I get to stay home
- Nothing
- Grades.
- The classes are easy
- I don't have to risk getting covid.
- Completing Accelus at the beginning of the week.
- easier work.
- Its really easy
- P.E.
- My grades
- I feel like I learn things faster from one lesson than being in school.
- I don't have to go to school
- All of my teachers are amazing and super supportive.
- language

- alot of the classes are in the smae place as well as the other sites for work
- I feel like it is much easier because I have a lot of extra time to do work in my own home space.
- I don't have to go to school because I don't have any friends I truly relate to.
- I'm not sure.
- I don't know.
- being able to still have ways to message and meet with teachers with out being in person risking us to exposure
- the teachers are great help if you need anything
- I like with mom
- relax homes more
- I like to being home because I don't have to wake up so early to school.

Q11

What are some challenges you have in the full time distance learning program?

Answered: 76 Skipped: 321

- Attending classes and remembering what teacher is what day.
- Asking questions
- I truly don't have any
- i have bad wifi
- It's hard to get connected online, and hard to hear sometimes.
- The teachers no getting back to me very fast when I have questions about upcoming assignments. I also feel like Distance Learners are getting left in the dust when it comes to information about assignments.
- The teachers no getting back to me very fast when I have questions about upcoming assignments. I also feel like Distance Learners are getting left in the dust when it comes to assignments and getting information.
- Hearing the teachers and lessons.
- some o my teachers confuse me of what im suppose to do
- None
- Acellus is difficult to use

- knowing what work to do
- Communication with my teachers, and lots of work
- nothing
- None.
- Talking with teachers more often and Solid Works and Math and English
- Keeping track of Acellus.
- It can be strange to get work done sometimes
- when the wifi is bad so you got to work around it
- i have some problems paying attention at home because of the in home distractions and the problem of not getting face to face help, its like teachers can explain how to do something that is part of the class but they cannot show us step by step on how to do it.
- Not really the program, but I face some challenges just in lessons rather than overall with the program.
- Distractions.
- some times I wont know what to do on a lesions
- information
- Not much at all.
- Not face to face with a teacher
- I get stressed easily and fall behind
- sometimes i forget to check my email.
- having acellus deadlines and not seeing them on google classroom
- Sometimes instructions were confusing regarding how the clases went exactly
- Some motivation, but it's not a problem.
- Some challenges I have in the full distance learning program is being able to get help because of my internet connection issues.
- No motivation
- Just trying to keep up the Google meets. It's all confusing to me.
- I have trouble staying motivated, and I'm finding it difficult to keep up with all the assignments when I can't see and talk to my teachers at least once every week.
- Getting quizzes open for me to take.
- Acellus.
- the wi-fi
- none. I am much happier.

- Finding the instructions of certain assignments
- It takes a longer time to hear back from teachers
- what work i have to do for what class.
- That sometimes the work can be confusing.
- Not really anything
- No social interaction, annoying Zoom meetings IT JUST SUCKS!
- I didn't have challenges in the full time distance learning program just sometimes i cant really understand.
- I think the teachers get annoyed with the students .
- only having videos and quizzes, almost no hands-on assignments.
- no challenges
- nothing
- Sometimes I need help with things, but my parents help me when I need help.
- Learning with acellus
- Classwork.
- Sometimes I dont know how to get help
- Motiavtion.
- Getting work in on time.
- We are only watching videos
- Not being able to pay attention very well, or keep up on work, and lack of motivation.
- nothing
- Keeping up with homework
- I have no problems
- I have an extremely hard time learning anything. I used to be a straight A student but now I have horrid grades.
- I don't get to hang out with my friends often.
- the meeting and attending them on the directed time
- science
- None, there are no challenges in distance learning.
- No one really teaches the curriculum.
- I don't have any problems with distance learning
- Acellus.
- to much woirk

- Pacing myself with Acellus
- doing my homework
- hard working on the computer
- school is nice because friends there and ASL
- Close Caption getting me mess up because misspell.

Q12

What is one thing that would help you perform better in the full time distance learning program?

Answered: 73 Skipped: 324

- Make everything Easy
- Doing my work on time
- Nothing
- i was able to do school on my own time
- More options for me online.
- Honestly not being in Distance Learning at all. I feel like the teachers could give more information about the assignments because were not in class learning the information before we do the assignments.
- Honestly if I didn't have to be in distance learning at all. But I wish the teachers would give a little more information when posting assignments.
- Nothing.
- if my teachers can jus tell what im suppose to do
- Shorten the videos
- I would like to have some alternative to Acellus
- nothing i can think of
- I do not know.
- nothing
- If the teachers would say when they have meets.
- I'm not sure
- Going to one class at school Solid Works everthing is great
- An in person meeting once a week.
- not having any accellus work for english.

- having separate meets with some of your teachers every now and then
- being able to actually interact with teachers
- I dont think there is anything really.
- more information
- have teacher listen when people send emails
- If every class posted the homework in the todo list so it would be more organized.
- For acellus to stop skipping lesson to a different lesson
- when i do email my teachers and they help me by going to their zoom meetings
- Seeing all my deadlines/assignments in one place
- Im not sure, staing things a bit more clear maybe idk
- I think having a short meeting with each teacher at least once every week just so it could be a little more clear as to what I am supposed to be doing.
- I honestly don't know
- I don't really think anything.
- Have videos that can give us an overview of what were learning for the week.
- Everything is fine to me.
- More teacher contact (online).
- nothing I am happy.
- more instruction on assignments
- i dont know
- Nothing
- All the classes should only use one distance leaning program. The ag classes are not on acellus, some classes are just on google classroom and it gets confusing what work we have to get done for waht class.
- I'm not sure.
- Not really anything cause I'm doing good
- I don't know I think I'm okey
- Nothing
- no
- hands-on assignments
- nothing
- nothing
- I think distance learning is good already

- More classwork.
- Having less acellus
- Its already great
- I'm not sure.
- I do not know.
- Nothing.
- More hands on learning subjects
- more sleep
- Nothing.
- I think doing more work with the class would help motivate me to actually do the work.
- I dont know
- I don't know
- dont know
- better instructions on the work we are doing
- None, I feel like it is working out great
- I don't know
- I don't know.
- I am having no trouble with distance learning.
- Acellus in math and chem
- doing my work on time
- ASL and staff
- ASL
- With interpreter so, I can understand.
